PROFILE

I am a dynamic and a motivated junior developer driven by a fervent passion for programming. My journey into the realm of technology commenced with an insatiable curiosity and a profound desire to make a meaningful impact. The world of coding captivates me, and I am dedicated to continually refining my skills. I find inspiration in tackling complex problems, crafting elegant code, and collaborating with fellow tech enthusiasts. With an unwavering commitment to innovation, I am enthusiastic about pushing the boundaries of what's possible in the digital landscape.

PROJECTS

FULL STACK DEVELOPMENT

BoardRoom App: A Web-based Apartment Finder

October 2023 - June 2024

- Developed a web system using PERN Stack and MapBox API for locating boarding houses.
- Ensured an interactive user experience for finding ideal accommodations near Caraga State University.

FULLSTACK DEVELOPER

Cosmos Cafe: A Web-App for ordering Coffee

October - December 2023

- Led the backend development of an e-commerce web app for online coffee ordering.
- Utilized NextJS, NodeJS, Express, and PostgreSQL to ensure a responsive and efficient system.

BACKEND DEVELOPER

BudgetFlow: Tracker Expenses and Income

December 2023

- Developed a ReactJS and Laravel-based web app for tracking expenses and income.
- Ensured a user-friendly interface for capturing, recording, and categorizing financial data.
